SUMMARY

Seeking an opportunity to use my technical skills and to gain experience and knowledge by working with the reputed and challenging organization.

PROJECTS

Beauty Shop (console based) application :

- Developed a console-based Beauty Shop application in Java, focusing on object-oriented programming for efficient operations.
- Implemented features for product management, service bookings, and transactions.

Responsible Citizens :

- Created responsive forms using HTML, CSS, Bootstrap.
- Developed secure login, feedback, and complaint functionalities with PHP and MySQL.
- Applied best practices in data validation and password security.

Responsive E-Commerce Website :

- Designed and developed a fully responsive e-commerce website using HTML, CSS, and JavaScript.
- Implemented core functionalities including dynamic product listings and shopping cart operations.
- Created a clean, user-friendly interface with intuitive navigation and structured layout.
- Deployed the project using GitHub Pages for live access and easy portfolio sharing.
